EXPERIENCE

Softtronix Software Services Pvt. Ltd., NAGPUR (IT Park) Jan 2025 – June 2025

MERN Stack Developer intern

- Developed and deployed scalable web applications using MongoDB, Express.js, React.js, and Node.js (MERN) stack.
- Designed and optimized database schemas, improving query performance and data retrieval efficiency..
- Built responsive UI components with React.js and TailwindCSS, ensuring cross-device compatibility.
- Integrated RESTful APIs for secure communication between front-end and back-end services.
- Collaborated with team members using Git & GitHub for version control and agile development practices.
- Participated in code reviews, testing, and debugging, ensuring high code quality and maintainability.

PROJECTS

BiyNest *React.js, Tailwind CSS, Express.js, Node.js, MongoDB, GitHub, Vercel, Render*

- Developed a feature-rich social media platform enabling users to share and explore content seamlessly.
- Designed and integrated responsive UI components using Tailwind CSS to ensure a consistent and user-friendly experience across devices.
- Added features for user login, registration, creating posts, viewing users and searching posts by captions.
- Implemented tools for saving, liking, updating, and deleting posts, with dark mode and light mode options and included user guide using Driver.js to enhance the user experience.
- GitHub-Frontend: <https://github.com/HARSHAL360138/biynest-frontend>
- GitHub-Backend: <https://github.com/HARSHAL360138/biynest-backend>
- Live: <https://biynest-frontend.vercel.app/>

Lovely Classes *React.js, Tailwind CSS, Express.js, Node.js, MongoDB Atlas, GitHub, Hostinger, Render*

- Developed a full-featured online learning platform for a coaching institute with student registration, course management, and video integration.
- Implemented UI components with Tailwind CSS for seamless user experience.
- Implemented secure user authentication (JWT-based login system) and dynamic routing using React Router.
- Created RESTful APIs for managing classes, students, and schedules using Node.js & Express.
- We have used the git repository for version control and code check in/out Identified and managed.
- Deployed the application using Hostinger and Render, ensuring high availability and performance.
